BP6211B

Fast Turn-Off Synchronous Rectifier for CCM/DCM Flyback Converter

Features

- Integrated 60 V / 14 mΩ MOSFET
- Adaptive gate drive and faster turn-off speed
- Supports DCM, QR and CCM operations
- Ringing detection prevents false turn-on i
- Supports low-side and high-side recti
- Self-biased and no need for auxili
- high-side rectification
- Supports wide output volt
